C:\Users\Student\Documents\ThreadedBST.exe

```
===== Threaded BST Menu =====
1. Insert a node
2. Display inorder traversal
3. Find predecessor & successor of a node
4. Display predecessor & successor of every node
5. Verify results against inorder sequence
6. Exit
Enter choice: 1
Enter value to insert: 15

===== Threaded BST Menu =====
1. Insert a node
2. Display inorder traversal
3. Find predecessor & successor of a node
4. Display predecessor & successor of every node
5. Verify results against inorder sequence
6. Exit
Enter choice: 1
Enter value to insert: 25

1. Insert a node
2. Display inorder traversal
3. Find predecessor & successor of a node
4. Display predecessor & successor of every node
5. Verify results against inorder sequence
6. Exit
Enter choice: 5

Inorder sequence: 15 25 45 55 65 75

Node    Pred(thread)  Pred(seq)   Succ(thread)  Succ(seq)   Result
-----------------------------------------------------------------
15      None          None        25            25          PASS
25      15            15          45            45          PASS
45      25            25          55            55          PASS
55      45            45          65            65          PASS
65      55            55          75            75          PASS
75      65            65          None          None        PASS

Verification: 6/6 nodes matched. ALL RESULTS CORRECT.
